Perl / Ruby / PHP / Python
NodeJS / JavaScript
HTML5 / CSS3

Profile

I recently graduated from EPITECH after spending a year abroad in Concordia University, Montreal. I am specializing in systems and networks administration but I also have strong skills in development.

Education

2008–2013	**Expert** in Information Technologies	EPITECH, France

EPITECH has an innovative methodology based on projects, group work and autonomy which allowed me to turn my passion into a real expertise.

2012	**Computer Science** exchange student	Concordia University, Canada

During two semesters at Concordia University, I had the opportunity to study computer science in this prestigious university.

Experience

Since 09/2012	**BSO Network Solutions**	Paris, France

Systems Engineer
As an engineer at BSO, I am responsible for the outsourcing of client's platforms sometimes larger than 200 hosts. I am also in charge of the integration of new solutions, providing advices to the customer and doing level 2 & 3 support.

07/2012–09/2012	**Azendoo**	Bordeaux, France

Mobile Developer (Mission)
Using responsive web techniques, JavaScript and Backbone.js, I had to develop a cross platform mobile application. I learn to build great and optimized HTML5/CSS, good looking user interfaces and also to write efficient JavaScript code to ensure the best possible interactions with the application.

06/2011–08/2011	**Azendoo**	Bordeaux, France

Developer & Administrator (Internship)
I participated in the development of Azendoo web application, using the latest Web 2.0 standards and also to the implementation of the system's architecture and deployment of the application in production.

Skills

System	UNIX Systems / Lifecycle & orchestration management
Virtualization	VMWare, Xen
Monitoring	Zabbix, Nagios
Network	Brocade Loadbalancers & Switches / Fortinet Firewall
